THE FUTURE OF MARITIME TRAINING MANAGEMENT IS HERE

Seamless, Integrated Training Management System

ADVANCED TRAINING MANAGEMENT SYSTEM FOR MARITIME PROFESSIONALS

Robust ■ **Enterprise-wide** ■ **Integrated**

Serving training operations around the globe since 2000, AQT Solutions is a leading provider of comprehensive and cost-effective recurrent regulatory compliance training management software for maritime freight forwarders, third party logistics providers, shippers and carriers of hazardous materials. Our ATMS™ system is an enterprise-wide, integrated solution that manages dangerous goods training programs delivered through onsite instructor-led and eLearning models.

- ✓ **ATMS** is used to build training curriculums for existing presentation based training, organize and maintain records, administer records, schedule training, deliver e-learning, collect and store training results, automatically reschedule future training for desired date, provide reporting and analysis capabilities.
- ✓ **Our system** also provides trainees and instructors access to their records, schedules and e-learning from the web or mobile devices. Additionally, instructors can grade training on the mobile device while disconnected from the network.

Why Choose ATMS™?

- ✓ RECORDKEEPING MANAGEMENT
- ✓ INTEGRATED LMS PLATFORM
- ✓ VALIDATED TRAINING & CERTIFICATION
- ✓ FLEXIBLE MOBILE GRADING
- ✓ AUTOMATED SCHEDULING
- ✓ HIGHLY CONFIGURABLE

ATMS™
MARITIME

ARE YOU AUDIT-READY & COMPLIANT?

The Problem?

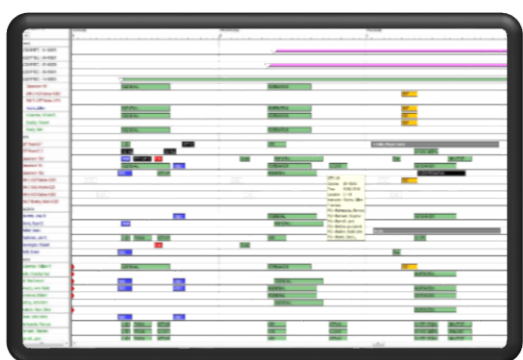

Federal regulators conducting more frequent audits, greater scrutiny of training records, increasing volume of regulations to adhere to. Reliance on manual, archaic process to manage training is costly and inefficient.

The Solution? As the requirements of training and management evolve, so will the need for a robust training and recordkeeping system to keep your valuable maritime shipping and logistics trainees current and qualified with a modern, integrated and user-focused platform. The future of dangerous goods/hazardous materials training management system is ATMS. Advance your DG/HM training delivery, improve consistencies in training, and ensure recurrent training scheduling and compliant recordkeeping on a platform that enables end-to-end, integrated training.

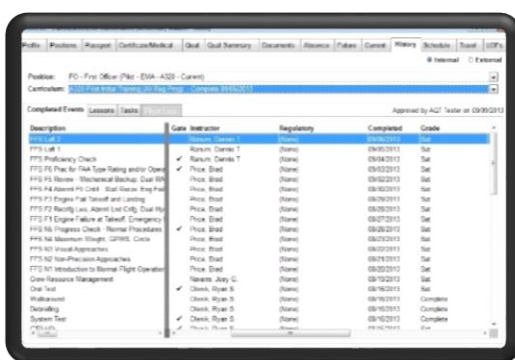

PRODUCT HIGHLIGHTS

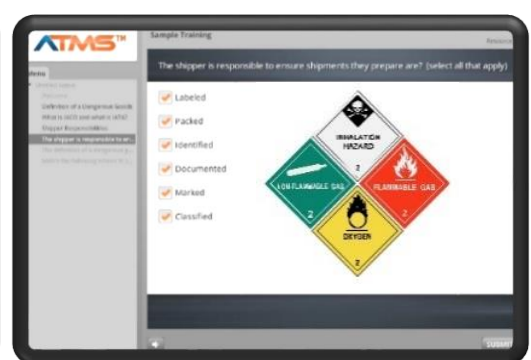

Flexible Access For Maritime Training Administrators, Instructors & Trainees

SCHEDULING

RECORDKEEPING & HISTORY

E-LEARNING

THE MODULES

Seamless, Integrated Dangerous Goods & Hazmat Training Solutions

CURRICULUM DEVELOPMENT

- ✓ Supports the development of training programs for all personnel.
- ✓ Defines instructor qualifications required to teach a training course.
- ✓ Upload existing eLearning, PowerPoint, Articulate, Storyline content to run seamlessly.
- ✓ Unlimited amount of course development as your company's training needs grow.

SCHEDULING & RESOURCE MANAGEMENT

- ✓ Displays a schedule by course showing classroom, instructor and trainee availability.
- ✓ Allows an administrator to approve a completed course, triggering a recurrent training date.
- ✓ Prevents unqualified instructors from being assigned.
- ✓ Notifies the scheduler when a trainee fails or does not attend a training event.

TRAINING RECORDS & CERTIFICATION

- ✓ Maintains comprehensive trainee and instructor training history.
- ✓ Allows administrators to approve a completed course, triggering a recurrent course to the desired date.
- ✓ Advance warning of training expiration dates to allow managers and administrators to take preventative action.
- ✓ Provides a complete and accurate training history for each student to ensure compliance.
- ✓ Store and print Certificates of Training or licensing documents.

E-LEARNING & EVALUATION

- ✓ Delivers SCORM-compliant eLearning content.
- ✓ Real-time tracking of e-Learning progress.
- ✓ Training results may be entered from anywhere.
- ✓ Immediate instructor review of historical training results.
- ✓ Displays briefing instructions online for presentation to trainees.

ABOUT

AQT SOLUTIONS

Located in Napa, California's Premier Wine Region

AQT Solutions is a leading provider of comprehensive and cost-effective training management software to training operations to ensure compliance.

In March of 2000, AQT set out offering ATMS to multiple sectors of the aviation industry. These sectors include the commercial airlines, cargo carriers, 3rd-party training companies, military, crew providers, regulators, corporate operators, oil and utilities, helicopter operators, service contractors, charter operators, and fractional ownership operators. ATMS was originally developed and implemented at Alaska Airlines in 1998.

The AQT management team has extensive experience in aviation training and software implementation and integration. Bill Carson, CEO, has over 25 years of managing large application development and implementation projects. Bill's background and experience in the aviation industry began at NASA's Human Factors Division, focused on man-machine integration projects such as head-up displays, flight deck CRM, long-haul sleep studies, and other human performance research.

As AQT's Director of Sales, Jason Keith has an exemplary understanding of ATMS having implemented and used the system for over five years. As a pilot for AirNet Systems for 12 years and director of flight training for six, Jason was responsible for training management of one of the largest air cargo airlines in the US. Jason's methodologies were highly structured and utilized military-precise standards. Jason is well-versed in the needs of ensuring safety and compliance within the aviation industry's regulatory environment.

As AQT's Regulatory Compliance Analyst, Melissa Powers has extensive experience utilizing ATMS for a variety of training management systems. As AirNet System's Regulatory Compliance Coordinator for over 15 years, Melissa was responsible for managing an extensive dangerous goods training program, TSA security programs and an airport security program. Melissa is knowledgeable in areas of dangerous goods/hazmat and TSA compliance and the complexities surrounding these regulatory areas.
